## Deck Mat

thermo-treated ash tree

**GLOBALDIS** started to commercialize these heat-treated ash tree mats, as ideas for outdoor spaces: garden footpaths, swimming pools, balconies, among others.

As ash tree is a hard wood and very strong by itself, with this heat and water steam thermic treatment, the wood is improved as well as its dimensional stability (reducing humidity balance) and its long durability (by thermal insulation, drying and resin removal, preventing the presence of fungus and rotting, resulting in a great solution to use outdoor.

Ash tree wood also acquires a uniform brown color, with a smooth surface nice to the touch.

Each mat is 2 meter long and 0,9 meters width and it is made of 31 guideways, 21 mm thick.
